Multi-Box – The 'Smart' Multi-Purpose Tool Box

The Multi-Box is a robust and ergonomic tool and storage box.
It comes with smart accessories, and is easy to transport and take to any place of work.
"In my opinion, this is the smartest tool box on the market. We have taken the best from all boxes on the market, and combined them into one", says Thomas Johansson, Vice President of Modul-System.

The new Multi-Box is a practical storage case with an attractive design and smart functionality. It is larger than the assortment of boxes Modul-System is currently offering, and as the name suggests, it is extremely versatile.

"You can pick and mix the products you want and create a box that is suitable for you. For example, you decide if you want a lid or not, and in that case if you want a traditional or a hinged version", Thomas Johansson explains.

In addition to components such as the lid and hinge set, there are several accessories available. Dividers can be used to create smaller compartments at the base of each box. Plastic inserts can be used either separately or together with the dividers.

"We also offer tool holders, making each tool easy to find and keeping the inside of the box nice and tidy. The assortment of accessories will expand further in the coming months", Thomas Johansson promises.

Thanks to the intelligent design, several boxes can be stacked on top of each other. By releasing the stacking clips, the content of each box is easily accessible. The front window makes it easy to determine the content in each box without opening it. It is also possible to use one lid for several boxes.

The Multi-Boxes can be integrated in the Modul-System racking. They can be placed directly in the shelves or between two shelf end supports on fixed or extendable shelves.

When several boxes need to be used on a job, they can be stacked on top of each other and placed on a trolley.

"The trolley is robust, lightweight and foldable, hence taking up a small space in the vehicle. We also offer a smart fixing solution for the trolley in the vehicle", says Thomas Johansson.

About Modul-System
Modul-System develops, manufactures and installs racking systems and equipment for service vehicles. The company is represented in 40 countries and has close to 50 years of experience in the industry. Modul-System is part of the Lifco group. Its head office is located in Mölndal just outside Gothenburg. For more information, please visit www.modul-system.com.
